

German Int. School: started successfully into the third school year

EDUCATION Facility expansion inevitable

The Deutsche Schule Chennai inaugurated its second school building after its establishment in January 2010. The expansion was essential for the development of the school since admission for Kindergarten and Primary School has increased significantly in the past 6 months.

The new school building has acquired a more spacious facility for the Secondary students as well as a physics and chemistry lab. The school is currently able to

enroll up to 150 students in the school campus. In comparison to other international schools in Chennai the German International School is also enrolling students of any nationality. This creates a multi-cultural understanding.

The German International School emerges thanks to its distinguished German International Curriculum and its interdisciplinary personnel; the teaching staff is mainly from Germany, but the school has also teachers from Belgium, Hungary and Rumania. These international experts underwent a dual education which ensures a high-quality teaching concept at Deutsche Schule Chennai.

At the establishment of the German International School two and a half years ago, very high standards of education management and training had been set to maintain a very high level of quality for the education of the children. The School is now proud to announce that it has not only managed to uphold its high standards but has even gone beyond its set goals and is now a locally and internationally recognized establishment.

The German International School is a partner of the *Infinite Opportunities*

Thomas A. Pallushek – Advisor, Melanie Rolf- Principal, S. Raj – Regional Director AHK

programme “Germany + India 2011 – 2012” and the school in particular is one of the 50 fastest growing companies in India.

More information on admission at Deutsche Schule Chennai and its concept is available on the website: www.dschenai.com
